

BitNinja Reduces Hacks and Server Load for Ganesh Hosting

Ganesh Hosting has over 20 years' experience as a leading web hosting service. It offers cutting-edge hosting solutions including dedicated servers, VPS and various cloud services. Ganesh Hosting focuses on providing complete server protection for its major-league customers, which include Morand Distillery and GroupeMutuel.

Frequent cyber attacks disrupt Ganesh Hosting's business operations

Ganesh Hosting spent precious time and resources on a daily basis dealing with security attacks. Attacks varied from vulnerability exploits and brute-force attacks to code injections via PHP script uploads and spam attacks. The constant threats caused disruption to Ganesh Hosting and left its clients vulnerable.

BitNinja's cloud-based solution blocks attacks where others failed

Ganesh Hosting tried several security solutions, but none offered enough protection. Simon Hintermann, Sysadmin at Ganesh Hosting explained; "We tried many methods to block them, but nothing was enough". BitNinja's all-in-one server security suite was the perfect remedy for Ganesh Hosting's cybersecurity problems. It does all the heavy-lifting using an automated, easy-to-use defense system designed to protect against all major security issues. Using machine-learning technology, BitNinja adapts to the latest threats and maintains the highest standard of server protection.

The results

Simon at Ganesh Hosting further commented on the benefits of BitNinja; "Before we started using BitNinja, we had major problems. Our capacity was severely reduced during the attacks and we faced password hacks and PHP code injections. But after introducing BitNinja, we experienced major positive changes, including fewer hacks and reduced overall load on the servers". BitNinja's complete cybersecurity suite protects thousands of servers against a multitude of attacks including malicious scans, targeted attacks, botnets and Dos detection.
